Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

William Johnson

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. The internet should be viewed as a public utility. It is to our times what the interstate highway system was to the mid-20th century, and what electricity was to the 1920's-1940's. It is the newest piece of technology that will aid all Americans alike, without distinction of religion, sex, race, and especially social class, corporate standing, and wealth. It is the stuff that the American dream is made of. Please maintain Net Neutrality.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

Cable providers are monopolies. Where I live I have no choice but Comcast, and no choice but to purchase their prescribed packaging. I cannot buy internet alone. Combine the racketeering practices by the cable-providers with the bandwidth-purchasing payola that is going to ensue, and the embezzlement from the US public rises to levels rarely seen before. And why? Because FCC's chairman lives in the cable co's pocket. FCC has a responsibility to act in the name of the VAST MAJORITY of consumers and businesses. ENOUGH exploitation. Enough acting against the public's nearly unilateral will. Do your job, FCC. Net Neutrality and the prevention of Comcast/TWC merger are the only acceptable answers.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Melinda McComb

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. If you relate the concept of the internet to roadways, which, for the most part, are publicly funded and controlled, we see how they are both connectors for people and businesses to get where they need to go or the information they want. But if you allow private corporations to control the roads of the internet, it's just like selling off the streets to private entities, and I'm sure you can imagine how corruptable and stifling turning all roads into toll roads would be for innovation and commerce.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Michael F.Dugan

Re: WC Docket No. 14-28 Comments

In the early days of television, licenses were limited and buyers of stations had an obligation to operate in the public interest. As the years went by the owners operated as if they had invented the station as Edison invented the light bulb. Their entitlements were stressed and their obligations were forgotten or weakened. Now, it's the Internet that is in the forefront. We must remember that providing the public with the best tools to use the Internet should be our first and paramount concern. Please do not favor the powerful at the expense of the public. We must reclassify the Internet as a public utility. Thank you.

Re: WC Docket No. 14-28 Comments

We need net neutrality. Without this service providers will be able to adjust the bandwidth that allows music and businesses to get through or charge to have priority. On a personal level this will be unfair for people, but more so on a business level, a lot of businesses could be crippled if they don't have the proper bandwidth they need to conduct business.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jack Pearce

Re: WC Docket No. 14-28 Comments

I was one of the earliest users of the PC, starting with a "Trash-80" that had a cassette tape for backup. Later I became a programmer and administered IT for a company in Baltimore. Now I am sixty-six and disabled. While there are already barriers to my use of the Internet (the cost of cable, for one), to foresee that this last bastion of democracy will fall to corporate greed makes me heartsick. Greed and power threaten one last source of information that is not completely shackled by corporate interest. It has taken years for some groups in our society to catch up to early innovators such as myself. Now that the cost of technology for individuals is lower, corporate powers are trying to lower the boom on net neutrality. Brings to mind other odd developments that make me less and less able to live on a fixed income. In Albuquerque, where drought warnings have caused plain ordinary folks to lower their water consumption remarkably, the price of water is going up as a reward for their husbanding. Too little usage won't pay for maintaining the infrastructure. So it goes...the rich get rich and the poor get poorer. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

This is wrong. Many people use the internet in their daily lives. My mother and I are disabled it is a lifeline for us. My mother needs it to pay vital bills in our household. It is likely the only way I'll be able to get higher education. The US already pays more for internet then other leading countries and gets less for their money. If you divide the internet into lanes it will just be another reminder that America is no longer for the people, but for corporations. Please do not pass these, it will affect Americans daily lives.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gloria Faltstrom

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Christine Stewart

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Robert Scott

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Christina La Cour

Re: WC Docket No. 14-28 Comments

The Internet has the potential to empower people and destroy tyrants, great and small. It can over-
end the hierarchy of the empowered over the masses. Social media has been shown to be a
powerful organizing tool, capable of getting a message out in minutes. This is about top down
control as opposed to bottom up leveling. As an Internet user who believes strongly in the
importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a
telecommunications service, and save Net Neutrality. In addition, the FCC should reject the
proposed rules that would allow Internet service providers to divide the Internet into fast lanes for
wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Anne Rhodes

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

mike SINGLETON

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Morgan Sinclair
